

TASOTFILT

MANHOL ODOR FILTER

NO MORE AIR POLLUTION

TASOTFILT ABOUT

TASOTFILT filter system, a patented product that removes harmful and unpleasant odors from sewage manholes, drains and other ventilation ducts.

Our interest in developing reliable, nature friendly and a cost-effective odor filter system was driven by the needs of our clients and their general dissatisfaction with traditional odor control solutions and we believe that our development provides our clients with a new and better odor elimination option and we are proud that we are the only company in Turkey that produces Patented Manhole Odor Filtre Systems.

OUR SERVICES

TASOTFILT Manhole Odor Filter System is already being utilized across the Turkey, including municipal areas, shopping centers, office buildings, amusement parks and more.

Our satisfied customers include municipalities, contractors, dealers and private companies.

TASOTFILT

INSTALLATION INSTRUCTIONS

1. PLACE BARRIER CONES AT SERVICE AREA. NEVER LEAVE A MANHOLE UNCOVERED AND UNSUPERVISED.
2. REMOVE MANHOLE COVER. CLEAN FRAME UNDER COVER.
3. TASOTFILT WAS DESIGNED TO FIT ALL STANDARD MANHOLE COVERS.
4. WITH ITS SPECIAL HOOKS TASOTFILT IS EASILY PLACED BELOW MANHOLE COVER.
5. A SPONGE GASKET CREATES A TIGHT SEAL BETWEEN MANHOLE AND THE FILTER.
6. SMALL GAPS AROUND THE FILTER ARE FILLED WITH POLYURETHANE FOAM.
7. THE FOAM PREVENTS PASSAGE OF INSECTS AND GAS LEAKS.
8. FILTER FITS IN A PERFECT MANNER.

INSTALLATION PROCEDURE TAKES ONLY **10 MINUTES**.

THE LIFE OF THE ODOR ABSORBING CARTRIDGE AT EACH MANHOLE VARIES DEPENDING ON THE SEWER SYSTEM ACTIVITY, SEWER GAS CONCENTRATION AND AMBIENT CONDITIONS.

Always follow appropriate safety precautions when servicing sewermanholes. This includes personnel protection, traffic, and ventilation. Sewer gases are dangerous and contain hazardous, poisonous, flammable and explosive gases. Only experienced trained workers following safety requirements should work around sewer manholes.

TASOTFILT ADVANTAGES
